

## Responsible Investment

Bupa Arabia recognizes the importance of environmental, social, and governance (ESG) factors to the long-term financial stability and societal well-being. Hence, ESG considerations are integrated into our investment policy statement (IPS) in order to strengthen our governance framework and to align with sustainability efforts of the Kingdom's Vision 2030.

Reasonable efforts are made to invest in environment-friendly and green projects. Such investments may include fixed income and equity instruments where companies promote sustainability and aim to limit carbon footprint. Where applicable, an ESG score is sought after as a criterion for market screening.

Additionally, our investment mandate adheres to socially responsible investment practices that are guided by Sharia principles which confine investing in accordance with religious and cultural values. Our investment portfolio avoids investing in companies operating in areas such as alcohol, military, gambling, and tobacco to name a few.

Lastly, corporate governance best practices are factored into our due diligence to assess decision-making processes, segregation of duties, risk management control measures, and succession planning amongst others.
